Testimonial: "There are two components essential to our business survival: the first being the ability to provide the level of high quality products competitively, and the second, to transport them efficiently and cost effectively from origin to destination. I have experienced more than 30 years in the transportation and logistics industry. During these years I have had direct responsibilities supervising the logistical movement. It is with the background I would like to state that Cargo Partners International Inc. has been a valuable asset to our company. The service provided has been completed to our satisfaction and needs. I highly recommend Cargo Partners International Inc. and the personal integrity Ms. Turchio brings to get the job done. Yours in partnership, Marc Mallais, ABC Group, Logistics Manager"
